

SAFETY MIXER GIA-25

A thermostatic valve with high mixing capacity. The valve is special designed to temper water to emergency showers. The mixed water temperature is **fixed to +25°C**.

In case of a breakdown on the cold water side, the valve will automatically close the flow of hot water. On the other hand if a breakdown occurs of hot water the valve will go into cold-water bypass flow and continue to deliver cold water to the safety shower. Unit is constructed of bronze, brass, copper and stainless steel. The valve is delivered including two check valves

Part no: 799 7551

Capacity 120 l/min at 3 bar
Supply: 1" / DN25
Body: Brass CW625N
Min flow: 9 lit/min
